PROFESSIONAL SUMMARY

Full Stack Developer in career transition, with experience in React.js, Node.js, C++ and MySQL. Since 2019 I have contributed to AzerothCore, an open source C++ project, fixing bugs and submitting community-reviewed patches. At Estácio, I won the Startup Experience in the AI category with GoSafe, a travel risk analysis application built with React.js, Node.js and Google's Gemini AI. Before programming, I spent over 10 years in technical support, computer maintenance and telecommunications, including team leadership.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js

Backend: Node.js, C++, PHP, Lua

Databases: MySQL, MongoDB

Tools and practices: Git, GitHub, API integration, agile methodologies

DEVELOPMENT EXPERIENCE

Open Source Contributor (volunteer) | AzerothCore 01/2019 – present

Open source World of Warcraft server emulator written in C++ with a MySQL database.

- Investigate and fix bugs in a large, community-maintained C++ codebase.
- Fix encounter scripts and game mechanics, validating behavior through in-server testing.
- Submit patches through community-reviewed pull requests, including the mod-cfbg module.
- Technologies: C++, MySQL, Lua, Git.

Open Source Contributor (volunteer) | TrinityCore 01/2017 – 12/2018

- First work with server emulation in C++ and MySQL databases.
- Bug fixing and participation in discussions about new features.

PROJECTS

GoSafe – Travel Risk Analysis | Estácio Startup Experience Winner, AI category

- AI-powered application built as a team, with React.js on the frontend, Node.js on the backend and integration with Google's Gemini AI. Currently being developed for market launch.

Lich King - Origins | Self-hosted World of Warcraft server

- Server and MySQL database administration, C++ scripting and design of the in-game economy systems.

API do Zero | github.com/EricksOliveira/api-zero

- REST API built with Node.js and MongoDB, with full user CRUD operations.

PROFESSIONAL EXPERIENCE

Customer Support – Multichannel | Concentrix 01/2025 – 01/2026

- Customer support via phone, chat, app and WhatsApp.
- Answered customer questions and resolved their requests.
- Looked up and verified information in internal systems, such as transactions and account data.

Cashier | Supermercado Nova Opção 01/2023 – 10/2023

- Customer service at checkout and bill payment processing (invoices, electricity and water) through the company system.
- Supported other store functions as the team needed.

Telecommunications Repair Technician | Brisanet Telecomunicações 12/2019 – 05/2022

- Team leader for over 1 year and 6 months.
- Fiber optic network repair, modem and router maintenance, and installation of new access points.
- Diagnosed and resolved connection issues and handled customer address changes.

IT Technician | Evolução Informática 06/2010 – 10/2018

- Maintenance of computers, laptops and printers, both in-store and on-site at customers' homes.
- Installation and configuration of wired and wireless networks and internet access.
- Prepared quotes, sold parts and controlled service costs.

EDUCATION

Systems Analysis and Development – Estácio | Started in 2024, enrollment paused after the 2nd semester

- Winner of the Startup Experience in the AI category with the GoSafe project.

Online courses – **Fundação Bradesco (2023)**: Basic HTML; Advanced HTML; Build a Simple Website with HTML, CSS and JavaScript; Innovating with CSS.

SOFT SKILLS

Problem solving • Fast learner • Teamwork • Leadership • Clear and concise communication
